EXTERNAL ADVERSARIAL AUDIT — CERTIFICATE

Block B — External Inputs AX1/AX2 vs Literature

Subject:

Linear-Error Clique Partitions of Split Graphs (Erdos #81, Paper III), review version v0.9.5. Lean formalization explicitly OUT of scope.

Scope of this block:

B1 AX1 (Haxell-Rodl/Yuster) faithfulness and not-stronger check; B2 AX2 (Dross + Barber-Kuhn-Lo-Osthus) threshold and divisibility; B3 usage localization (bulk / sparse only; Prop 10.1 uses neither).

Evidence summary:

AX1 is the K3 instance of the published theorem (verbatim in Yuster arXiv:math/0305350 abstract, attributing fixed-graph case to Haxell-Rodl); AX2 appears verbatim in Dross arXiv:1503.08191 abstract ((0.9+eps)n, triangle-divisible). Citation metadata verified. Usage census confirms localization. Coverage: paywalled journal texts verified at abstract level.

Primary results file:
