

Paper II v1.2 Package-Residual Internal Audit

Internal author-side audit — not external

21 August 2026 — Overall verdict: PASS

Protocol: PAPER_II_INTERNAL_PACKAGE_RESIDUAL_v1.0.

Lean execution: no. **Manuscript/PDF regeneration:** no; all six artifacts are byte-identical.

1 Target

The audit covers Paper II `preprint_draft_v1.2` after a package-only correction to the stale integrity directory identified by the external `PASS_WITH_RESIDUALS` report.

External report	1e7afd3e9394bf83beb7e33ce19ff5227072fcd6b0eb3fd21e571329564e3ded

The corrected package freeze contains 200 files and 3,417,038 bytes. Its canonical LF-only manifest SHA-256 is `ddc50d1cb1fd16a788d03738806a381043134f1df7a0262808379892902b96ec`. The construction algorithm is published in the R0 summary.

2 External findings

EXT-PII-M-001 — PASS/CLOSED INTERNALLY. The stale v1.1 integrity directory was replaced. Both integrity sidecars are LF-only, resolve only to present v1.2 files and verify completely. The v1.1 to v1.2 semantic diff and current target perimeter are now explicit.

EXT-P2-I-001 — NOTE PRESERVED. The external HTTP 403 is a nonblocking access limitation. The open-status claim remains supported by the primary EOZ source verified in the external audit.

3 Gate results

Gate	Verdict	Evidence
R0	PASS	17/17 correction, anchor, sidecar and hygiene controls.
R1	PASS	58/58 canonical static controls.
R2	PASS	195 LP; 5,000 maximization; 6,667 argmax; 139 atlas; 931 copy; 22 terminal checks.
R3	PASS	No exact or near duplicate blocks.
R4	PASS reuse	Unchanged archive; 8,063-job build and 16 axiom surfaces; no Lean run.
R5	PASS reuse	Six unchanged hashes; prior 47-page rendered QA reused.
R6	PASS	Gate manifests, report, archive and sidecar verified.

4 Semantic integrity

No manuscript, theorem, definition, assumption, quantifier, constant, equation, proof step, citation, novelty claim, translation, figure, LaTeX source, PDF, Lean source or formal archive changed. The correction affects only package integrity, audit status and residual evidence.

5 Verdict

PASS. All seven internal residual gates pass. There are zero unresolved blockers, majors or minors. This author-side result is not human peer review and does not prove global novelty. A narrow independent external residual re-audit must issue its own plain **PASS** before Paper II is externally closed.
