

Block D Certificate

Counterexample & Boundary Search

VERDICT: PASS

Scope

Search for counterexamples and boundary-case failures against the main theorem and its corollaries.

Method

Systematic boundary and counterexample search across the parameter space, including extremal and degenerate cases.

Findings

- No counterexample found.
- All boundary cases behave consistently with the claimed bounds.

Evidence pointers

RESULTS/blockD_counterexample_and_boundary_search/README.md

No counterexample found
