

EXTERNAL ADVERSARIAL AUDIT — CERTIFICATE

Block A — Paper-Ledger Faithfulness & Internal Consistency

Subject:

Linear-Error Clique Partitions of Split Graphs (Erdos #81, Paper III), review version v0.9.5. Lean formalization explicitly OUT of scope.

Scope of this block:

A1 verbatim-equivalence of all 18 LEDGER nodes vs manuscript v0.9.5; A2 dependency-DAG reconstruction from the proofs (acyclicity, Section 9 assembly hygiene); A3 census of external inputs incl. Appendix D self-containment.

Evidence summary:

35/35 statement anchors present; per-node comparison table: no statement-level discrepancy; DAG acyclic, matches ledger; AX usage localized as claimed. FINDING A-1 (minor): strongest self-containment phrasings overstate (classical Dirac / Turan / chi-prime(K_t) also used). 3 presentational observations.

Primary results file:

results/blockA_census_results.txt SHA-256:

801eaeedfdaea53ae1ba91092dac9d1c7eb4644326598dccac9984e8d27f065d

VERDICT: PASS_WITH_OBSERVATIONS

Auditor: external adversarial audit agent (Claude, Anthropic model claude-fable-5), independent tooling.

Date: 2026-07-21 Package audited: see received_inputs.sha256
