Block E — Audit of the Internal Audit

Subject:

Linear-Error Clique Partitions of Split Graphs (Erdos #81, Paper III), review version v0.9.5. Lean formalization explicitly OUT of scope.

Scope of this block:

E1 re-run of all four internal blocks; E2 adversarial script reading; E3 boundary stress of their shared formula module and grids.

Evidence summary:

E1: all four blocks reproduce BIT-IDENTICALLY, grid counts re-derived. E2: 3 minor script defects (unimplemented advertised check; float tolerance; unchecked solver status - fail-safe direction), none verdict-affecting. E3: 0 mismatches on 20k+ boundary/random cases.
